

North Carolina State Parks

JUNIOR RANGER

ACTIVITY GUIDE

HOW TO BECOME A JUNIOR RANGER

Protect, Explore, Learn

COLLECT OR "CACHE" ACORNS

To be a **Basic Junior Ranger**: cache **20** acorns

Earn an official Jr. Ranger patch for the park and a certificate.

To be an **Expert Junior Ranger**: cache **40** acorns

Earn an expert patch along with the park's patch and a certificate.

Becoming an expert Junior Ranger may take multiple days to achieve.

HOW TO CACHE ACORNS

PROTECT: Complete a community service project in the park to cache 5 acorns. Call the park before your visit to see if they have any projects available. See page 24 for more information.

EXPLORE: Cache 3 acorns for each mile you hike in a park and record your mileage on page 6. Write about your experience in your Junior Ranger Journal (page 26). Kids In Parks Track Trails are a great option. To learn more, visit www.kidsinparks.com.

LEARN: Cache from 1-3 acorns by completing the activities in this guide. Record your cache in the space provided at the end of each activity.

 = **1** acorn for this activity

 = **2** acorns for this activity

 = **3** acorns for this activity

Cache 5 acorns for attending any park event or program and answer the questions about it on page 23.

When you complete your cache, take this guide to a park staff member to receive your Junior Ranger patch and certificate!

PARK SAFETY TIPS

- Always have an adult with you
- Bring water and snacks
- Stay on trails
- Dress in layers. Wear a hat and closed-toe shoes
- Apply bug spray and sunscreen
- Check for ticks when you get home
- Don't feed wildlife. Report sick or injured animals to park staff.
- Learn what poison ivy looks like - leaves of three, let it be!

ABOUT

Name of State Park or State Recreation Area

Did you know that you would have to travel all the way from Canada down to Florida to experience all the ecosystems that you can find right here in North Carolina? There are 41 N.C. State Parks where you can explore all of these beautiful ecosystems. Each park has features that make them special and unique. As you are exploring your park, find out what makes it special.

ANSWER THE QUESTIONS ABOUT YOUR PARK BELOW TO CACHE 5 ACORNS!

What are three things that make this park special?

1. _____
2. _____
3. _____

How did the park get its name? _____

Draw a star on the map of N.C. to show the location of the park you're visiting:

Acorns cached on this activity: _____

EXPLORE THE PARK

Get a copy of the park's map. Use the map's legend to help you locate the hiking trails, water, picnic areas, bathrooms and roads.

Hike a trail! Cache 3 acorns for each mile you complete!

_____ MILES X 3  = _____

As you explore, find one special spot. Draw a picture of your spot in the box below.

Answer the questions below about your spot:

1. Describe your spot. What makes it special? Is it sunny or shady? What do you see? What do you hear?

2. How did you get to your special spot? What trails did you take? What was the color and shape of the trail blaze? How long was the hike?

3. What are your first impressions of your spot? How does being in your special spot make you feel?

Acorns cached on this activity: _____

ABOUT PARK RANGERS

North Carolina Park rangers do a variety of jobs in the park and use many tools to help them complete their daily tasks. Draw a line from the picture of the tools to the name of the tool and then to the job they help complete.

CHAINSAW

FORESTER

BADGE

TEACHER

BINOCULARS

BIRD WATCHER

HIKING BOOT

PARK CLEANER

TRASH GRABBER

POLICE OFFICER

FIRST AID KIT

PARK DOCTOR
(first Responder)

CHALKBOARD

PATROLLER

Continue this activity on the next page

INTERVIEW A RANGER - FIND A PARK RANGER AND ASK THEM THESE QUESTIONS:

1. What do you like best about being a park ranger?

2. What is the most difficult part of being a park ranger?

3. What is something strange or something funny that you have seen at the park?

4. What is your favorite season at your park and why?

5. How did you become a park ranger?

6. Come up with your own question to ask:

Question: _____

Answer: _____

PARK HISTORY

Go to the park's museum, a park historical program, or visit their website to learn about the history of the park. You may learn about American Indians that once lived there. Or you may learn about old cabins, farms, or the park's opening.

Artifacts are things that people made a long time ago and left behind - like arrowheads, tools or old fence posts.

Draw a picture of an artifact that you think might have been found in the park in the box below.

What did you learn about park history? What was the land like before it was a park? Imagine that you are traveling here many years ago. Write what you might see:

A long, long time ago... _____

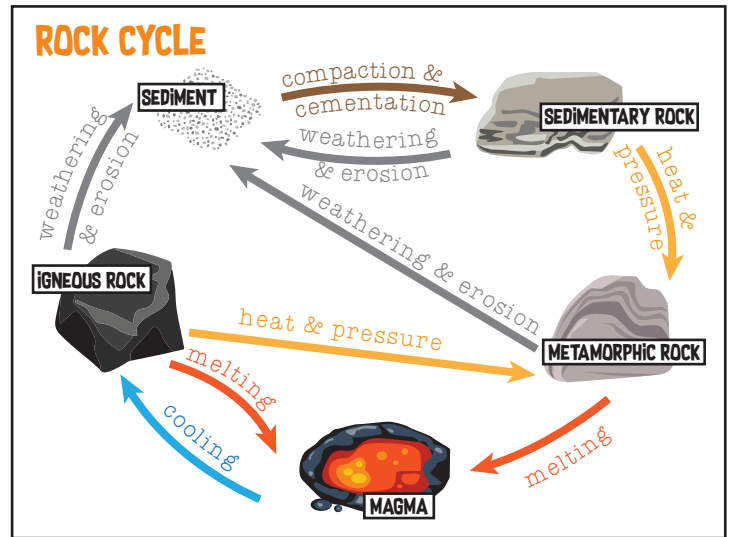

Acorns cached on this activity: _____

GEOLOGY

Take a look at the ground next to the trail. Soil can come in many different sizes.

If possible, smear a small amount of soil into the box below.

What color is it? _____

What does it smell like? _____

Check the box of the size of the soil.

Be a “rock hound” and try and find some of these common rocks! If you find one, draw it under it’s picture below. Then, using the information on the above graph, label whether you think the rocks are igneous, metamorphic, or sedimentary.

SANDSTONE

This rock is made of sand-size pieces of minerals or sediment that are stuck together by natural cement.

GNEISS

This rock was changed from its original form by heat and pressure to create this new type of rock. If you see a rock with black and white bands or stripes, it is probably gneiss.

GRANITE

This rock was once totally molten magma (hot, gooey rock) that slowly cooled underground. It has blotches of different colors including black, pink, gray, white and others.

Acorns cached on this activity: _____

WATER

You are always inside of a river basin even if you're not near water. All the water within the park eventually drains to a river, estuary, or lake and finally ends up in the ocean. Our actions in the park affect both water quality and quantity downstream.

Using the map of the river basins in North Carolina below, figure out what river basin the park is in and circle it.

ANSWER THE QUESTIONS BELOW:

1. Using your park map, find a major body of water in the park (river, lake, stream, estuary). What is it called?

2. How do people use this water?

3. Other than lakes or streams, where do you think the plants and animals in the park get their water?

Acorns cached on this activity: _____

ANIMAL SIGNS

Often it's difficult to find animals in the park, so how do we know they are there? By the things that they leave behind, called "animal signs."

Be a wildlife detective! See how many animal signs you can find from the list below.

ANIMAL TUNNEL

SPIDER WEB

SCAT/DROPPINGS

INSECT CHEWED LEAF

FEATHER

BIRD'S NEST

**ANIMAL CHEWED
PINECONE**

ANIMAL TRACKS

Draw two of the signs you found in the space below and make an educated guess what animal or insect left them behind.

Animal that you think left the sign

Animal that you think left the sign

Acorns cached on this activity: _____

PLANTS

Sometimes the names we give plants have to do with how they look. Scientists sometimes name plants after their interesting characteristics. These are called the plant's common name.

In addition to the common name, all living things also have a universal name called the "scientific name," and no matter what language you speak, it's the same. These names are often based off of Latin and the first part of the name refers to the species' genus which is similar to your last name. The second part is the specific species' name, like your first name.

Find two interesting plants or mushrooms and examine them closely. Take a photo or sketch them below. Write a description of it and come up with your own creative name for it.

1

_____ *Your creative name*

2

_____ *Your creative name*

Ask park staff or look up the plant in a field guide or online using your description, make an educated guess on the two plants from your sketches.

PLANT #1

BIRDWATCHING

Birds are one of the easiest animals to find in parks because parks help to protect their habitats. There are more than 400 different kinds of birds in North Carolina! There are many ways we can tell different species of birds apart. We can look at the colors of their feathers, the shape of their bill, or listen to their call.

Use the chart below to take notes on two different bird species.

	BIRD #1	BIRD #2
LOCATION - Where is it - beach, forest, parking lot?		
BILL - Shape and color?		
COLOR - Head, back, chest?		
BEHAVIOR		
OTHER NOTES		
SKETCH		

Ask park staff or look up the bird in a field guide or online using your description, make an educated guess on the two birds from your chart.

BIRD #1

Common Name:

Scientific Name:

BIRD #2

Scientific Name:

Acorns cached on this activity: _____

SENSES

While out in the park, use your senses to discover the natural world around you. Listed below are four of our five senses. We have left off taste because there are many plants in the park that are harmful if eaten.

Spot something beautiful and draw it here.

Sit in one spot and listen to the sounds around you for a few minutes. Afterwards create a sound map - the person in the middle is you. How many sounds were man-made versus natural?

Man-made: _____ Natural: _____

Find a unique smell and describe it. What do you think you are smelling? What does the smell remind you of?

See if you can find 4 things with very different textures. Draw them or do a rubbing of each item below.

Acorns cached on this activity: _____

ECOEXPLORE

One way you can help scientists study the plants and animals in the park is through a partnership between N.C. State Parks and The North Carolina Arboretum. By joining ecoEXPLORE you can earn great prizes and badges. **Register online at www.ecoexplore.net.**

REGISTER TO BECOME AN ECOEXPLORER AND CACHE 3 ACORNS!

How To ecoEXPLORE:

- Register online at www.ecoexplore.net
- Go outside to find wildlife species, including plants, reptiles, amphibians, insects and birds.
- Photograph your wildlife observation, noting the data, location, time, size, and species observed.
- Login to your ecoEXPLORE profile online and submit your observation.
- Arboretum staff will then review your observation and submit all approved submissions to the iNaturalist Network, which is used by real scientists!

KIDS IN PARKS

A great way to strengthen your connection with nature is to explore the natural and cultural treasures found in North Carolina State Parks. The Kids in Parks program can help you do that with TRACK Trails. Each trail features a series of self-guided activities that guide you on a hike filled with discovery. Even better, you earn free prizes for each hike you register on the program's website. **Get started at www.kidsinparks.gov**

BECOME A TRAIL TRACKER AND CACHE 3 ACORNS

1. Find a TRACK Trail near you at www.kidsinparks.com
2. Use the activity brochures to turn your hike into an adventure.
3. Register your hike on the website to earn your free prize.
4. Find more TRACK Trails to hike and earn more prizes!

Acorns cached on this activity: _____

LEARN IN THE PARK

ATTEND ANY PARK PROGRAM OR EVENT AND ANSWER THE FOLLOWING QUESTIONS TO CACHE 5 ACORNS!

1. What was the name of the program or event?

2. What is your favorite thing that you learned?

3. What is the one thing you will never forget about it?

4. What would have made the program even better?

Acorns cached on this activity: _____

PROTECT THE PARK

Now that you understand more about the park, help us protect it by doing something to make the park a healthier place for wildlife, plants and people. Ask a park ranger to help you plan your project. Be sure to call the park ahead of your visit. Depending on the time of year, you can pick up litter, plant trees, or remove an invasive plant.

COMPLETE YOUR COMMUNITY SERVICE PROJECT AND ANSWER THE QUESTIONS BELOW TO CACHE 5 ACORNS!

1. What did you do to help the park?

2. Why was the project important? Who or what did you help?

3. What's one thing you will never forget about this community service project?

4. What could you do to help the park in the future?

Acorns cached on this activity: _____

SHARE YOUR PARK EXPERIENCE

BEFORE RETURNING HOME FROM YOUR VISIT AT THE PARK, ANSWER THE QUESTIONS BELOW ABOUT YOUR EXPERIENCE TO CACHE 5 ACORNS!

1. What was your favorite thing you saw or did at the park? Why?

2. What's your favorite thing you learned about the park? Why?

3. Why do you think N.C. State Parks are important?

4. What is one thing you did to help protect the park while you were there?

5. How can you share your park experiences with others?

Acorns cached on this activity: _____

YOUR PLEDGE

Use this space for writing or drawing your thoughts and feelings on your journey to become a Junior Ranger. You can also use this space if you run out of room on another page.

Basic Junior Ranger: cache **20** acorns

Earn an official Jr. Ranger patch for the park and a certificate.

Expert Junior Ranger: cache **40** acorns

Earn an expert patch along with the park's patch and a certificate.

Add up the acorns you cached from each activity.

MY ACORN CACHE: _____

Find a park staff member and recite the following pledge with them:

I (your name),
recognize that this park is MY park too.

I promise to help take care of my park.
I will do what I can to help keep the park clean.

I will treat animals and plants with respect
and leave them in their park home.

I will learn about the importance of nature
and our duty to protect it,

and I will share what I learn
with my friends and family.

Once you have recited the pledge and cached the required points you will receive a certificate of completion and park patch – or a pair of patches if you've reached the expert level!

**CONGRATULATIONS! YOU ARE NOW
AN OFFICIAL JUNIOR RANGER!**

Official Junior Ranger

This certifies that

Your name

Has successfully met the requirements of becoming an

Official Junior Ranger at _____

Park name

for the North Carolina Division of Parks and Recreation.

Date

N.C. State Parks Staff Member
