

**Medoc Mountain-Explore Outdoors** Name: \_\_\_\_\_

Get outdoors and take a closer look at some of the flowers near your home, neighborhood, or school. How many different ones can you find? Look for different shapes, sizes, colors and numbers. Do not forget to observe the leaves. Leaves come in different shapes, sizes and colors too!

*Draw what you observe and make notes with your drawings.*

***Curious about what is under that log or rock?***

Go outside and carefully roll a rock or log over to see what's underneath. Roll the log towards you so that any critters under it will move away from you. Look for ants, gnats, beetles, worms, larva and possibly a reptile or amphibian! Write and draw about what you notice and what you wonder?
