

# NC SCIENCE TRAIL

STEM stands for science, technology, engineering, and math. STEM careers include animal scientists, park rangers, lab technicians, and designers. People who choose STEM careers usually like solving problems and are curious about how the world works.

When you grow up, what STEM job would you like to do?

---

Draw yourself doing a STEM job below!

Use the QR code below or visit [ncsciencetrail.org](http://ncsciencetrail.org) and check out the NC Science Trail. If you need to, you can connect to Wi-Fi in the park office.

Choose one place on the Science Trail you'd like to visit. Look at that place's website to read more about them, or you can plan a trip and visit them too!

Which place did you choose? \_\_\_\_\_

As a Junior Ranger we have a duty to learn, protect, and explore just like Park Rangers. How does the place you read about help us learn, protect, and explore with science?

*Example: At the zoo they protect endangered animals and teach you why we need to save their homes.*
